

Senior Quality Assurance Analyst

JOB
DESCRIPTION

Reports To: Director, Product Management

Role: Senior Quality Assurance Analyst

Job Description:

The Senior Quality Assurance Analyst's role is to develop and establish quality assurance standards and measures for the organization. This will include writing test plans and scripts for tracking defects and fixes in product development, software application development, information systems, and operations systems. The QA Analyst will apply proven analytical and problem-solving skills to help validate IT processes through careful testing in order to minimize client disruption with errors/bugs getting released into production.

The ideal candidate will have 5+ years' experience as a QA Analyst and be dedicated to developing routine tests, and able to coordinate testing across the organization in a fast paced technology company.

This position will work with Developers and Product Managers to develop, maintain, and execute quality assurance testing procedures.

Primary responsibilities include:

- Develop and maintain testing processes, enhance and improve testing processes, maintain test plans, manual and automated test scripts for user interface, functionality, system and "ad-hoc testing"
- Execute regression tests, functional tests and data tests
- Document quality assurance practices
- Report, track and determine priority of reported bugs

Requirements:

- BA/BS in Computer Sciences/Engineering or associated discipline or the equivalent experience
- Well-versed in all testing methodologies (white vs. black box test work, system vs. functional).
- Proven track record in testing the Microsoft technology stack including websites built in .net and powered by SQL Server
- Well-versed in software process methodologies.
- A solid understanding of quality assurance as part of the development process.
- Detail oriented and a problem solver
- Excellent verbal and written communication skills
- Ability to work in a rapidly changing, ambiguous environment

Preferred candidates will have experience with:

- c#, [vb.net](#), classic asp, sql server
- Experience with automated testing toolsets
- scripting or programming experience

Compensation:

Compensation consisting of base salary and benefits package will be commensurate with experience and competitive with comparable positions at ecommerce companies.
