

JOB DESCRIPTION

Reports To: Chief Technology Officer

Role: The .Net Developer designs, modifies, develops, writes and implements software programming applications and components. Supports and/or installs software applications and components. Works from written specifications and pre-established guidelines to perform the functions of the job and maintains documentation of process flow.

Primary Responsibilities:

- Utilize established development tools, guidelines and conventions including but not limited to Visual Studio, ASP.NET, SQL Server, HTML, CSS, JavaScript, and C#/VB.NET
- Create and deliver data-driven reports
- Design, code and test new Windows and web software applications

- Enhance existing systems by analyzing business objectives, preparing an action plan and identifying areas for modification and improvement
- Maintain existing software systems by identifying and correcting software defects
- Investigate and develop skills in new technologies
- Create technical specifications and test plans
- Create new and extend existing operational documentation
- Consult closely with management and occasionally agency staff related to projects and tasks
- Consult colleagues concerning maintenance and performance of software systems
- Implement new software

Skill Requirements:

Successful candidates will likely have at least 5 years of experience in a professional capacity and a Bachelors degree in Computer Science, Information Systems or related field.

- ASP.NET
- SQL
- HTML
- CSS
- JavaScript
- C#/VB.NET
- Experience with WinForm and Microsoft Dynamics CRM are a plus, but not required.

Compensation:

Compensation consisting of base salary and benefits package will commensurate with experience and competitive with comparable positions at eCommerce companies.
