For immediate consideration, please send resume and salary requirements in Word format along with contact information to careers@shopvisible.com .

Position Description:

- Seeking a Junior to Mid Level Developer to work as the new e-Commerce support developer for maintenance and minor development projects for the e-Commerce Platform
- Team member will have a role on support team on production defects identified in the Front-End applications implemented into production and minor development projects
- Day-to-day interaction will include close work with the Front- End Team, Developers and Quality Assurance Analysts
- Opportunity to practice an Agile Development methodology and principles

Required Knowledge and Skills

- Experience working with and debugging multi-tier architecture – expect experience level to be strong customer focus across both types of work environment
- Experience working on customer-facing sales/service applications with a strong focus on analyzing application defects.
- Must thrive in complex, fast-paced environment with limited documentation. Results-oriented and self-starter demeanor expected, along with adherence to team development standards in program fixes.
- Ability to work in a multidisciplinary, collaborative, team environment.
- Ability to work with multiple individuals
- Demonstrated ability to regularly communicate complex technical issues, solutions and designs to a wide variety of audiences, from Project Management to Developer to Desk level user
- Solid experience working on a team using a Agile Development Methodology a plus. In lieu of demonstrated experience, aptitude for developing according to Agile principles a must.

Qualifications

- 2+ years in role as a team member
- Deep understanding of Microsoft technologies in the web environment
- Experience with debugging complex object models, design patterns, and multi-tier applications
- 2+ years Development experience on distributed and mainframe platforms
- 2+ years .net development in multi-tier, multi-platform, high availability IIS based applications
- 2+ years C#; JavaScript; HTML; Visual Studio; ASP.Net
- 2+ years experience writing and debugging SQL Server stored procedures
- 2+ years in XML development
- 1+ years of Salesforce experience or similar product experience
- Proven experience in Visual Source Safe or similar product experience

- Understanding of Web Services (e.g. SOAP, SOA, AJAX)
